TO WHOM IT MAY CONCERN

This is to certify that **Amritanshu Monarch**, a student pursuing **B. Tech- CSE (Specialization: Cyber Security)** at **IILM University**, has successfully completed an internship with **IPGST India Private Limited** from **01st June 2026** to **31st August 2026**.

During the internship, Amritanshu worked as an **Intern** in the **Network Security division**. The internship was explicitly structured around the systemic analysis of enterprise protocols, security policies, and high-availability frameworks. Rather than being assigned to standard physical rigging or custom software programming tasks, the operational focus was directed at the translation of complex RFC specifications, the visual decomposition of network handshakes, and the optimization of technical documentation for internal deployment gaining practical exposure to deeply explored protocols like DNS/DNSSEC, DHCP, ARP, VLANs, and TLS 1.3, alongside next-generation firewall architectures (Cisco ASA vs. FTD) and high-availability failover configurations.

We appreciate his contribution and wish him every success in their academic pursuits and future career.

For IPGST India Private Limited
